

»»» SOLUTION BRIEF

Veridium and ForgeRock

Forget Passwords. Forever.

ORCHESTRATE PASSWORDLESS

Together, Veridium and ForgeRock support passwordless authentication for customers, employees and transactions.

With ForgeRock's IAM orchestration engine you can quickly design and implement strong passwordless authentication across your SAML environments. Veridium is a ForgeRock Trust Network Partner. ForgeRock verifies the integration and provides tools so that you can visually manage the passwordless identity journey for your users.

THE FORGEROCK IDENTITY ARCHITECTURE

ForgeRock provides dynamic intelligent orchestration across identity journeys for employees, customers and transactions.

EMPLOYEES

With the ForgeRock Identity Platform, you can rely on real-time, contextual, and consistent security for employee login management and SSO.

CUSTOMERS

With the ForgeRock Identity Platform, you can offer customers products and services that cater to their preferences, via any device.

ForgeRock

BENEFITS

INCREASE SECURITY

- Strong Passwordless
- FIDO2 certified (WebAuthn)
- Behavioral Biometrics
 - Spot “spoofers” with false user profiles
- Open integration to 3rd party biometrics
 - Face, Fingerprint, Iris, Voice

REDUCE COSTS

- No password synchronization
- No password resets
- No password policy
- No password/token management
- No lost or broken tokens

INCREASE USER SATISFACTION

- Support native iPhone and Android biometrics
- Deliver choice of Touch ID, Face ID and more

EARN USER TRUST

- Provide secure digital services that are easy to use
- Meet Open Banking, PSD2, NYDFS and other user protection standards

PASSWORDLESS AUTHENTICATION PLATFORM

The VeridiumID passwordless authentication platform replaces PINs and passwords with biometric multifactor authentication. This independent authentication layer gives you the freedom to customize the user experience – choosing the best biometrics for your needs – from native fingerprint or face to Veridium's patented 4 Fingers TouchlessID and vFace, or 3rd party biometrics (e.g. Iris).

VeridiumID easily integrates to provide strong authentication decisions wherever they are needed via the mobile app. From your PAM users to specific use cases like high value financial transactions where compliance requires non-repudiation capabilities, VeridiumID provides the strongest level of authentication assurance with biometrics. Veridium can differentiate between valid users and imposters with InMotion behavioral biometrics capabilities which log the movements and location of users to identify fraudsters immediately.

As a ForgeRock Access Management user, you can easily add biometric authentication into your authentication flows with SAML Federation with a ForgeRock validated module or node.

ABOUT VERIDIUM

Veridium is a leader in the development of user-centric authentication solutions which link biometrics (what you are) to smart phones (what you have) for trusted digital identities. Our authentication platform and proprietary biometrics provide strong authentication, eliminating the need for passwords, tokens, or PINs – delivering multi-factor security with single-step convenience at a lower total cost of ownership than traditional MFA solutions.
